

AFREEN KHATUN

Full Stack Developer

Kathmandu, Nepal | khatunafreen742@gmail.com | +977 974-6401748
[linkedin.com/in/afreen-khatun](https://www.linkedin.com/in/afreen-khatun)

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience delivering production web platforms for government and enterprise clients, including Nepal's national immigration, electricity authority and business registration systems. Comfortable across the stack — Vue.js, React, Django, and PostgreSQL — with particular strength in authentication and single sign-on (CAS), role-based access control, and reusable UI component systems. Currently pursuing a Bachelor's in Computer Application (BCA) at Tribhuvan University.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, Vue.js, HTML, CSS, Tailwind CSS

Backend & Data: Django, REST APIs, PostgreSQL, Query Optimization

State Management: Pinia, Redux-style patterns

Architecture: System Architecture, Microservices, Multi-tenancy

Authentication & Security: CAS (Central Authentication Service) / SSO, OTP-based Authentication, Role-Based Access Control (RBAC)

Tools & Workflow: Git, Pull Requests & Code Review, Agile Stand-ups, Performance Optimization

PROFESSIONAL EXPERIENCE

• **Full Stack Developer — Ambition Guru, Kathmandu** 2024 - Present

Includes an initial 4-month Web Development internship before transitioning to a full-time role. Worked across three flagship products spanning government and enterprise clients:

Nepali Port — Department of Immigration, Nepal — *Public Portal & Admin Portal, nepaliport.immigration.gov.np*

Built with Vue.js, Pinia (state management), Tailwind CSS, and REST APIs. Module-level work:

- **Visa Services module:** public-facing screens with full CRUD for Visa On-Arrival, Visa from Nepalese Mission, Electronic Travel Authorization (ETA), Visa Extension, Visa Conversion, Visa Transfer, Entry Visa, and Visa Plan Upgrade.
- **Certification & Tracking module:** Arrival/Departure Certification, Non-Visa Arrival/Departure Certification, Visa Application Track, and Check Visa lookup screens.
- **Trekking Permit module:** Check Trekking Permit, Trekking Agency portal, and Individual Trekking Permit request flows.
- **Payments module:** Card Payment integration for online fee collection.
- **Admin module:** role- and permission-based dashboard where UI and available actions adapt dynamically to each admin's assigned permissions.
- **Authentication module:** login and OTP verification flow shared across both the public and admin portals.

- **UI/UX:** built reusable, dynamic Vue components and implemented UI/UX end to end across both portals.

NEA CRM — Nepal Electricity Authority — *crm.nea.org.np*

Built with Vue.js, Pinia, and Tailwind CSS. Module-level work:

- **Navigation module:** dynamic, role-aware sidebar spanning every module of the CRM.
- **Core CRM modules:** implemented functionality across the CRM's modules end to end, with Pinia-driven state management.
- **Authentication module:** login and OTP-based verification flow.

Learning Management System (LMS) with CAS — *Ambition Guru product suite*

Module-level work across the platform:

- **Single Sign-On module:** integrated CAS (Central Authentication Service) into the LMS so users authenticate once and move securely across connected applications.
- **Reporting & access control module:** dynamic report tables across all LMS modules, PostgreSQL query optimization, and role-based access control built on Django permissions.
- **Interface module (Zetalabs engagement):** responsive, high-performance React and Tailwind CSS interfaces, built in coordination with backend developers via REST APIs; performance tuning that cut page load times.
- **Form & Table Builder module (Silk Innovation engagement):** reusable Form Builder and Table Builder components adopted platform-wide, with seamless RESTful API integration, improving UI development speed and maintainability.

• **Full Stack Developer — Yaj Technologies, Kathmandu**

Business Registration System & eRental System — *Government platform,*

brs.yajtechnologies.com

Built with Vue.js, Pinia, and Tailwind CSS. Two services on one platform. Module-level work:

- **Business Registration module:** end-to-end registration flow from application through submission, review and approval, with full CRUD and validation at each stage.
- **eRental module:** rental request and management flows built inside the same application, reusing its authentication, permissions and shared component layer.
- **Authentication module:** OTP-based login and verification flow shared across both services.
- **Permissions module:** permission-based screens and navigation, where the actions available to a user derive from the role assigned to them.
- **UI/UX:** end-to-end UI/UX implementation with Vue.js and Tailwind CSS, with reusable components shared across both services.

EDUCATION

Bachelor of Computer Application (BCA)

Tribhuvan University · Batch 2025 · Ongoing

Higher Secondary Education (Grade 12), Science (Biology)

Tilottama Multiple Campus, Yogikuti · GPA 3.01

Higher Secondary Education (Grade 11), Science (Biology)

Tilottama Multiple Campus, Yogikuti · GPA 3.72

Secondary Education Examination (SEE)

Deep Boarding High School, Butwal, Rupandehi · GPA 3.85
